

HELP US STUDY
**MICRO
PLASTICS**

1. Identify a patch of sand 50 x 50 cm.
2. Use the sieve to filter out sand. Dig your patch to a depth of around 10 cm.
3. Remove non-plastic particles (e.g. leaves, sand, stones, paper, etc.) and spread the remaining contents in the square below.
4. Take a photo and upload it on the Andromeda portal by scanning the QR code (top left). Photo should show this whole page. Avoid shadows and windy days as much as possible.
